Career Objective:

To obtain a position of responsibilities that utilizes my skills and experience and keen to work in an environment where I can enrich my knowledge and unlock my potentials and also help organization to achieve success.

Technical Proficiencies:

- Key Skills: Functional testing, API testing, UI testing, Mobile Testing
- Automation Tools: Selenium WebDriver, Appium, Postman, Aurora DB
- CI/CD Tool: Jenkins, Azure pipeline
- Bug Tracking Tools: Jira, Azure DevOps Board
- Framework: TestNG, Specflow, Cucumber
- Language: Java, C#, Gherkin, PostgreSQL
- IDEs: Eclipse, IntelliJ IDEA, Visual Studio

Tachnical Summary:

- Having more than 5 years of extensive experience in Manual & Automated Testing of GUI and aspects of Client‑server and Web based Applications on multiple levels of **SDLC** and Software Testing Life Cycle **(STLC).**
- Worked with Retail and Payroll domain clients.
- Good experience of **more than 5 years** in creating test scripts using **Selenium WebDriver** with **Java** and **C#**.
- Expertise in **testing Hybrid Mobile applications** and performed the Apps testing in iPhone, iPad and Android devices.
- Experience in Functional, Regression and System testing using Manual and Automated testing tools.
- Experience in **Behavior Driven Development** using **Cucumber and Specflow**.
- Hands on experience of **API testing** using Postman.
- Designed and documented **REST/HTTP**, including JSON data formats
- Experience with creating **API Automation framework** and validation of JSON responses from differentendpoints simultaneously using Specflow and Cucumber framework.
- Developed automation scripts for Native Mobile Applications on **iOS** and **android** platforms using **Appium** and **Java**.
- Worked on **Cross browser testing**, browsers like Mozilla Firefox, Google Chrome and Edge usingWebDriver.
- Well versed with **Agile** process.
- Executed automated tests on Continuous Integration environment using **Jenkins and Azure Pipelines.**
- Experience in analyzing **Business, Functional and Technical** Specifications.
- Experience in writing **Test Plans, Test Cases, Test Procedures and Test Scripts** from requirements andUse-Cases.
- Understanding of **Priority** and **Severity** of a Defect.
- Experience in **Software Verification and Validation** based on Testing Methodology.
- Ability to work in a fast-paced, deadline-driven environment.
- Sound Technical knowledge, excellent exposure and ability to learn any tool quickly.
- Conducting Knowledge Transfer Sessions and mentoring recruits to improve workflow and to streamlineproject completion, guidance and work allocation to subordinates.

Professional Experience:

Currently working as a IT Analyst in **Tata Consultancy Services Ltd.** for more than 5 years.

Project: Experian - Consumer Credit Reporting Company | Bhubaneswar
07/2022 – Present

Roles and Responsibilities:
- Understanding complex functionalities, requirement gathering and test case creation.
- Design of around 350 test cases.
- Responsible for creating new automation script and along with management of automation test suite in Cucumber which is based on Selenium and Java framework.
- Collaborated with stakeholders to understand and analyze requirements and translate them into test scenarios.
- Monitored and maintained the CI/CD processes to ensure smooth and consistent delivery.
- Manual testing of new modules in postman.
- Used JIRA for identification, logging and tracking of defects. Worked closely with developers to reproduce issues, provide necessary logs and ensure timely fixes.
- Use of PostgreSQL for test data creation.
- Contributed to creating different test frameworks (comparison testing etc.) to meet customer expectations.
- Prepared and shared daily automation report to major stakeholders.
- Participated in daily stand-ups, sprint planning and retrospectives.
- Mentored and trained junior QA engineers on best practices in test automation, Cucumber and Java.

Project: Meijer- USA based Pharmacy Retail Chain | Bhubaneswar
